Midwest Petroquip Inc. does not represent itself as being an authorized dealer or distributor for above manufacturers. All trademark names and part numbers are for reference only.

© 2007 Midwest Petroquip Inc.

Midwest Petroquip Inc.

An experienced group of dedicated people producing quality parts at factory direct low prices.

Custom Metal Fabrication Midwest Petroquip Inc. can also manufacture any type of metal products used inside and outside of convenience stores, service stations and oil companies. Please call for more information and a quote.

In-House Powder Coating Midwest Petroquip Inc. does its own powder coating within our facility. This allows us to keep costs down, turn painted orders over quickly and allows the customer to custom order specific colors to fit their needs.

Our powder coating process starts with power washing the parts with a degreasing and phosphating fluid which removes grease, dirt and any light surface rust, then converts the surface of the steel through a chemical process that prevents corrosion. Next, parts are then oven dried and cooled. At this time the powder paint is applied with a powder paint application system and inspected for any flaws before being rolled into an oven to be cured at 400 degrees Fahrenheit. When the parts have cured they are removed from the oven, cooled and then they are ready for shipment to our customers.

We use powder coating exclusively because the quality and longevity of the painted surface is far superior to any liquid, spray-on paint. Although the process is more costly than liquid paint, we are certain that the customer will appreciate our commitment to the highest quality. We guaranty our powder coated parts are more resistant to chipping, scratching, fading and wearing than all other paint finishes. We use an Ultraviolet Protected paint that will resist fading from the sun. Our standard colors are semi-gloss white and black, unless otherwise noted. Specific custom colors of the client's choosing are available; however, non-standard colors may be subject to additional charges.

General Terms and Conditions

Payment

All orders are C.O.D. until credit is established. Customers with established credit are net 30 days, with a monthly 1.5% service charge on the unpaid amount.

Shipping

All products are shipped F.O.B. factory. Customer is responsible for all shipping and C.O.D. charges. Any shipping damages MUST be reported to delivery carrier at time of receiving shipment. Credit for damaged parts will not be granted if carrier was not notified at the time of delivery; nor will credit be granted under ANY circumstances after four business days of receiving shipment.

Shortages

All claimed shortages must be reported within four business days of receiving shipment. Failure to inspect shipment and report missing items will waive your right to make a claim.

Partial Shipment

In the unlikely event that we are out of stock on a certain item, a partial shipment will be sent. Any billing will only be for shipped items. The missing items will be sent as soon as possible.

Placing an Order

We prefer that orders be placed in writing, via fax, e-mail or U.S. Mail, with a corresponding Purchase Order Number. Following order placement, customer should call to confirm order placement, discuss any clarifications and will be informed of an estimated date of shipment.

Any Questions

Please call us at: (763) 785-6922 or (800) 207-3876 and now e-mail us at info@midwestpetroquip.com.

Materials Information

CRS-

Cold Rolled Steel. Material thickness varies by part; call us for specific thickness for a specific part. We use 22 Ga. – 16 Ga. (.030 - .060)

Powder Coated-

Also commonly known as electrostatic painting. Parts that are listed as Powder Coated are C.R.C. The Powder Coating process is far superior to liquid, spray-on paint because it is baked-on which increases the bond to the material and therefore lasts much longer. We use a Ultra-Violet Protected Paint. Standard painted color is White, unless otherwise noted, additional charges may apply for non-standard colors.

Bright S.S.-

Type 430 Bright- annealed Stainless Steel, Material thickness vary by part. We use 24Ga.-20Ga. (.024-.035)

Brushed S.S.-

Type 304 Stainless Steel. This material is non-magnetic and corrosion resistant. We use 24Ga.-16Ga. (.024-.060)

Rigidized S.S.-

Type 430 Bright- annealed Stainless Steel, Rigidized in a Diamond Pattern. Material thickness is 24Ga. (.024)

Aluminum-

Type 5052H32. We use .100 thickness.

Galvannealed-

An Iron – Zinc Alloy – Coated Steel for Corrosion Protection. We use 20Ga.-16Ga. (.035-.060). This material is available by special order only.

At Your Service

You can be sure that Brian, our owner, is on top of production, quality control and the everyday things that making sure our company is in a league of it's own. Brian@midwestpetroquip.com

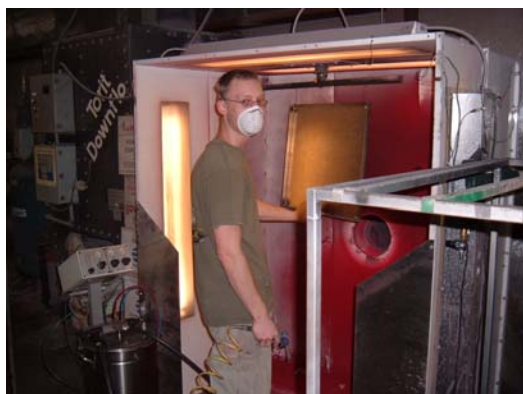

You all know John (right) he is working with Justin in our welding area maintaining the best possible engineering specifications. We have to keep John from doing 24-7, always reliable, you are number 1 always is John's philosophy. John@midwestpetroquip.com

Mike is there with enthusiasm and a genuine desire to make sure you, our customer is happy every day! Mike@midwestpetroquip.com

Our newest addition to the Midwest Petroquip team, Chub brings his experience of over 40 years in sales of industrial products. He is looking forward to working with you.
Chub@midwestpetroquip.com

Chris is the backbone of our “Powder Coat” area. We are proud of Chris’s performance, since we installed our equipment he has had trouble free years of managing our Powder Coating Production.

Keeps it moving and to spec! Is Eric’s main goal, he is always ready to step in when it takes “get-er” done!
